

SPRING-2025

Course Code: CSE-2424

Course Title: Database Management System Lab

Assessment Criteria or Rubrics for Assignments/Projects/Lab Activities

Item Name	Activity	Marks	Poor	Unsatisfactory	Average	Good	Excellent
Open End Project	Logical Schema/ERD Design (LSD)	5	Implemented less than 20% of LSD with major flaws and inconsistencies	Implemented around 40% of LSD but missing key relationships or attributes	Implemented about 60% of LSD with minor inconsistencies	Implemented 80% of LSD with proper structure but minor refinements needed	Fully implemented the entire LSD with correct relationships, attributes, and constraints
	Implementation of project (SQL (DDL, DML, DCL) or PL/SQL coding)	5+15	Implemented only 20% of required SQL/PLSQL statements with multiple errors	Implemented 40% of SQL/PLSQL statements, missing major functionality	Implemented 60% of SQL/PLSQL statements with minor syntax/logical errors	Implemented 80% of SQL/PLSQL statements with correct execution and minor inefficiencies	Fully implemented SQL/PLSQL statements with correct syntax, logic, and efficiency
	Report	5	Poorly structured report with minimal effort and lack of clarity, missing key sections	Report shows effort but has major deficiencies (e.g., missing graphs, incomplete sections)	Adequate report with only minor formatting or content deficiencies	Well-structured report with solid analysis and clear presentation	Exceptionally well-written report with strong analysis, creativity, and no faults
Mid-Exam	Implementing basic operators and functions of	20	Understands less than 20% of basic operators and	Understands around 40% of operators and	Understands about 60% of operators and	Understands 80% of operators and	Fully understands and applies SQL

	SQL (Apply)		functions with significant misconceptions	functions but struggles with proper application	functions with occasional errors	functions and applies them correctly in most cases	operators and functions efficiently and correctly
Final Lab Exam	DDL Statement Demonstration	15	Implemented less than 20% of DDL statements with major errors	Implemented around 40% of DDL statements but with syntax issues and missing constraints	Implemented about 60% of DDL statements but lacks optimization	Implemented DDL statements with proper syntax but missing some advanced structuring	Fully implemented DDL statements with proper joins, constraints, and optimization
	DML and DCL Statement Demonstration	15	Implemented less than 20% of DML/DCL statements, errors throughout	Implemented around 40% of DML/DCL statements but struggles with syntax and logic	Implemented about 60% of DML/DCL statements with minor logic errors	Implemented DML/DCL statements correctly but could be optimized	Fully implemented DML/DCL statements with correct joins, transactions, and optimizations
	PL/SQL and MongoDB Statements Demonstration	10	Implemented less than 20% of required statements with major flaws	Implemented around 40% of statements but lacks necessary structure and efficiency	Implemented about 60% of statements with minor errors in execution	Implemented 80% of statements with correctness but minor optimizations needed	Fully implemented all statements with efficiency, correctness, and best practices
Total		90
